General Secretary, Sports and Games

Technology Students' Gymkhana

Indian Institute of Technology Kharagpur

Academic Session 2026-2027

Proposal 1: Centralized Sports Portal and Athlete Support for Inter IIT Sports Meet

1. Centralized Sports Portal under Technology Students' Gymkhana

Objective:

To develop a centralized sports portal under the Technology Students' Gymkhana website that provides easy access to match schedules, live scores, and updates during the Inter IIT Sports Meet, ensuring better transparency, coordination, and engagement across all sporting activities.

Current Scenario:

- Students currently rely on multiple external platforms which are disorganized and not tailored to campus needs.
- Match schedules are not always easily accessible, and there is no centralized system for live matches and scores, leading to confusion and lack of clarity during events.

Implementation:

Once the Office Bearers are elected, the framework of the website will be discussed during the summer break in coordination with the Technology Students' Gymkhana. The portal will be developed as a dedicated section of the Technology Students' Gymkhana website and activated during the Inter IIT Sports Meet.

The platform will focus on:

- Displaying match schedules in a structured and easily accessible format
- Providing live scores for ongoing matches
- Sharing regular updates and announcements related to matches and events

The system will be designed such that information can be updated in a timely and consistent manner throughout the event, ensuring that students have access to accurate and real-time information from a single platform.

Impact :

- This initiative will contribute to the development of a more centralized and streamlined system for managing sports-related information.
- Students and stakeholders will benefit from having schedules, scores, and updates available in a single, easily accessible platform.
- This consolidation will improve consistency in information dissemination and reduce discrepancies arising from multiple sources.

Groundwork

- Interacted with the present Mr.Serampally Sidharth Reddy and Mr Mayank Singh (General Secretary, Sports and Games) of the Technology Students' Gymkhana and Mr.Daksh Yadav and Mr. Devansh Soni (Technology Coordinators) of the Technology Students' Gymkhana regarding the feasibility and workflow of the website.
- Interacted with students to understand the need for a centralized system and gather inputs on existing challenges.

2. Strengthening On-Ground Medical Support with First Aid Facilities and Player Supplements

Objective:

To strengthen all-time on-ground medical support by ensuring timely access to first aid facilities, along with provision of essential supplements and good quality diet for players during the Inter IIT Sports Meet camp.

Current Scenario:

- At present, access to immediate medical support at certain grounds can be further strengthened.
- There is also scope to improve structured nutritional support, which can contribute to better health, recovery, and performance of players.

Implementation:

- Ensure the availability of well-equipped and standardized first aid kits at all sporting venues, with each kit containing essential medical supplies in accordance with prescribed safety and sports medical guidelines. A comprehensive checklist of required items will be defined to maintain uniformity across all grounds.
- Establish a defined monitoring and replenishment system under designated authorities, with periodic checks and clear responsibility assigned to ensure that all first aid kits remain fully stocked and ready for use at all times.
- Implement the provision of approved nutritional supplements and quality dietary support for athletes during Inter IIT camps through authorized vendors, ensuring consistent and equitable access for all players.

Impact:

- This will ensure timely assistance in case of minor injuries or on-field incidents.

- It will contribute to improved health and recovery of players, thereby strengthening overall performance.
- It will also ensure that all grounds have adequate and uniform medical facilities to meet the needs of players.

Groundwork:

- Communicated with Mrs. Priyanka Kumari(Senior Sports Officer), Mr. Sanjeev Pandey (Cricket PTI), Mr. Soumen Mondal (Senior Sports Officer) to understand the current status of medical facilities available on-ground
- Interacted with Inter IIT players and other students involved in sports to understand the requirement for improved medical and nutritional support.

Proposal 2: Enhancing Student Participation through Inclusive Sports Engagement

Objective:

To make an inclusive culture by organizing engaging sports and fitness activities for students of all skill levels. It focuses on increasing participation, promoting a culture of active living, and turning the grounds into vibrant spaces for recreation and well-being.

Current scenario:

There exists a segment of the student body that has an interest in sports and games, however the overall participation of such students in the sports and games remains limited. Additionally, there is variation in their awareness of the rules, formats, and methods of participation in different sports.

Implementation:

- A registration form will be circulated to identify student interest and preferred sports from a curated list of available activities.
- Based on responses, feasible sports and workshop structures will be finalised.
- Participants will be grouped and scheduled into sessions, with the number of workshops varying depending on each sport's requirements.
- The programme will be rolled out from the Autumn Semester, with sessions conducted by the Physical Training Instructors.
- Periodic feedback will be collected from participants to refine future sessions and improve overall effectiveness.

Impact:

- This can result in a wider and more inclusive engagement of students in various sporting activities.

- It can provide avenues for the identification and encouragement of new and emerging talent that may not have had the opportunity of being recognized in the past.
- It can further enhance the culture of engaging in regular physical activity, thereby promoting fitness and contributing to well-rounded and holistic development.
- It can assist in the enhancement of awareness and understanding of the existing sports ecosystem in terms of the opportunities and initiatives available in Sports and Games.

Groundwork:

- Interacted with students across the campus, and noticed that the major problem faced by students was unfamiliarity with the techniques of different sports and games.
- I had a discussion with Mr. Samba Kar (Cricket PTI), Ms. Sangita Mondal (Yoga PTI), Mr.Sudhir Kumar (Volleyball In-Charge), and Mrs. Priyanka Kumari(Senior Sports Officer) about organizing the activities that will align with sports requiring beginner-level skills encouraging participation of students .

Proposal 3: Organizing PG & RS Tournaments with Official Gymkhana Recognition, Certificates, and Awards

Objective:

To boost Post-Graduate and Research Scholars participation in sports by creating dedicated opportunities through recognized tournaments. It will encourage greater involvement, provide a platform to showcase talent, and promote a more inclusive sporting culture.

Current scenario:

- Presently, structured and dedicated sports facilities for sports activities specifically designed for PG and RS students are relatively limited in number.
- There is a definite interest among PG and RS students in participating in sports activities, although this is not always reflected in terms of actual participation.
- Recognition of this segment in terms of platforms for showcasing talent is relatively lower in the existing sports framework.

Implementation:

- Organize dedicated PG & RS tournaments across various sports to encourage active participation.
- Ensure structured outreach and scheduling to maximize engagement within the PG & RS community.
- Provide official Gymkhana certificates and dedicated awards to recognize participation and performance.

Impact:

- This can encourage greater involvement of PG and RS students in activities beyond academics, contributing to a more balanced and engaging campus experience.
- Participation in such activities can also help towards holistic growth, which is not limited to academic growth only.

- Providing formal avenues for recognition can serve as a motivating factor, encouraging sustained participation and fostering a more diverse and inclusive representation across students from different academic programs.

Groundwork:

- Interacted with Post-Graduate students and Research Scholars regarding their involvement, availability, and interest in sports.
- A survey was conducted regarding their interest in participation in sports and relevant tournaments.
